(Integrated Agro-Meteorological Advisory Services)

AMFU, ICAR Research Complex for NEH Region
Arunachal Pradesh Centre, Basar-791101

District: Lower Subansiri

No: 27/2017/Tue

Dated: 4th April, 2017

Weather summary of the previous week	Weather forecast valid up to 9 th April 2017
Rainfall = 0.0 mm (Ziro)	Mostly sunny weather with possibility of light rainfall on 5 th and 9 th April. Daily maximum and minimum temperature for the following period is predicted to be 22-24°C and 17-19°C respectively. Expected morning and evening relative humidity will be 90-93% and 57-68% respectively. Wind direction is WSW with speed range of 2-7 kmph.
Warning:	<ul style="list-style-type: none">Heavy rainfall is likely to occur at isolated places on 5th April

Weather Based Agro-meteorological Advisories Bulletin

- Disinfecting the animal/bird sheds with lime powder/ bleaching powder/ 4%NaOH at regular interval is advocated
- Spraying operation should be done only on dry/clear weather
- Go for low cost polyhouses for year round cultivation of vegetables
- Obtain seeds from reputed/certified/reliable source
- Use fertilizers/pesticides as per recommended doses for the location
- Preference must be given on use of organic manures/bio-fertilizers & bio-pesticides
- ICAR Basar recommend poultry variety VANARAJA for backyard rearing

Crop	Stage	Pest/Disease	Precautionary Practices to be followed
FIELD CROPS			
Jhum field	Sowing		<ul style="list-style-type: none"> Adopt sowing of leguminous crops like cowpea, frenchbean, soybean etc at 2-3 rows across the slope of jhum field at desirable intervals or ratios with rice to prevent soil erosion and conserve moisture and fertility. Cowpea variety (Kashi Kanchan) and Frenchbean variety (Selection-9) are advocated for intercropping as they are short duration, dwarf and high yielding. Carry out seed dressing/treatment with Thiram or Carbendazim @ 2g/kg seed before sowing
Pea	Sowing		<ul style="list-style-type: none"> Sowing of pea recommended for higher altitudes with raised bed of 15-20cm Provide proper drainage to already sown crops
Maize	Sowing		<ul style="list-style-type: none"> Sowing of Maize advocated Carry out seed dressing/treatment with Thiram or Carbendazim @ 2g/kg seed before sowing Follow time isolation of atleast 15 days for two or more different varieties of maize in Jhum field
VEGETABLES			
Tomato	Vegetative/Nursery	Nursery insects	<ul style="list-style-type: none"> Cover the crop with polyethene/cloths to protect from frost/rain Nursery raising under protected cultivation Spray Azadirachtin 1% (10000 PPM) @ 1000-1500 ml in 500 litres water/ha
Pre-summer vegetables	Sowing	Nursery insects	<ul style="list-style-type: none"> Sowing of pre-summer vegetables like okra, frenchbean etc advocated Right time for transplanting the ready seedlings of chili, tomato, capsicum etc. Provide proper drainage to newly transplanted seedlings and follow raised bed for sowing Spray Azadirachtin 1% (10000 PPM) @ 1000-1500 ml in 500 litres water/ha
Cole crops	Nursery		<ul style="list-style-type: none"> Raising nursery can be carried out in higher altitudes/ cold areas
HORTICULTURAL CROPS			
Citrus	Flowering	Trunk borer/Phytophthora symptoms	<ul style="list-style-type: none"> Budding method of propagation (T-budding) to commences in oranges using Rangpur lime as rootstock. Cleaning & smearing of trunk base with Bordeaux paste If flowering begins, avoid spray of insecticides/ pesticides as it may affect pollination process. Spray (Planofix) NAA based growth regulator @2m/5lit water during flowering stage in orange plant to reduce fruit/flower drop
Ginger/Turmeric	Planting material collection/ Land preparation		<ul style="list-style-type: none"> Identify healthy plants for seed rhizomes/ collect better seedlings from ICAR Basar or KVK West Siang/Anjaw Keep selected rhizomes for planting material in partial shade for better sprouting. Mulching materials like forest litters or crop residues should be collected in advance Land preparation to a fine tilth to be done before sowing during sunny days Avoid sowing of Ginger/Turmeric during rainy days
Banana	Bunching	Cold	<ul style="list-style-type: none"> Timely/regular removal of extra suckers, dry leaves & pseudo-stem
Large Cardamom	Sowing		<ul style="list-style-type: none"> Should be sown in Primary nursery bed at 2cm deep and 10 cm apart followed by mulching & regular light irrigation. The duration of primary nursery being 3-4 months.
Kiwi	Planting		<ul style="list-style-type: none"> Pit size: 60cmX60cmX60cm Spacing: 6mX4m (Plant to plant and row to row)

			<ul style="list-style-type: none"> In kiwi the male and female plants are borne on different vines. So a male plant is provided for pollination of 6-8 plants at every third plant from the second row. Pit filling: mixture of top soil, 20-30kg FYM along with chloropyriphos@25-30g/pit (to avoid insect damage)
Apple	Vegetative	Woolly aphids	<ul style="list-style-type: none"> Swab the stem with mineral oil against woolly aphid.
Agroforestry			
Toko palm	Nursery		Filling of nursery polybags for raising of takopalm seedlings
Honey Bees			
Honey bees			<ul style="list-style-type: none"> Box must be covered with straw/dry leaves to provide warmth
LIVESTOCKS			
Livestock	Stage	Disease	Precautionary Practices to be followed
Pigs	All stages	FMD (high fever and appearance of mucous membrane of the mouth and foot.)	<ul style="list-style-type: none"> Animals should be given lukewarm feed and water. Keep the houses dry and clean. 1st injection at 6 months of age and 2nd injection at 12 months of age followed by annual vaccination under vet supervision
Poultry	All stages		<ul style="list-style-type: none"> Follow 'All in All out' system of rearing and do not rear birds of different age groups together. Avoid overcrowding. Provide adequate clean drinking water+electrolyte and multi-vitamins Vaccination as per the schedule with proper consultation with vet. <ul style="list-style-type: none"> ➤ Day old chick: HVT Marek disease vaccine, 4-7 days: F/Lasota, 14-18 days: Intermediate plus/IBD vaccine, 35 days: F/Lasota, 6-7 weeks: Chicken embryo adopted fowl pox vaccine and 56-70 days: RD R-2B strain. Remove wet litter/provide artificial heating and light
Fishery			<ul style="list-style-type: none"> Best time to prepare the culture pond like cleaning aquatic weeds
Cattle	All stages	FMD	<ul style="list-style-type: none"> 1st injection at 6-8 weeks of age, 2nd injection after 6 months of 1st injection followed by annual vaccination under vet supervision Separate sick animals The animal should be washed with lukewarm water added with little potash (KMnO₄) or neem leaves Long hair near the udder/stomach/back legs should be teamed short.
Mithun		FMD	<ul style="list-style-type: none"> Polyvalent FMD vaccine with serotype O, A and Asia at 6 months of age and repeat after that 6 months interval by sub-cutaneous route. Pregnant animals above 7 months of pregnancy should be avoided.
Contact Scientists (ICAR) or State Agril Staff or KVK staff for measures against adverse conditions or call at 03795-226237/226247

AMFU, ICAR Research Complex for NEH Region
Arunachal Pradesh Centre, Basar-791101

District: Upper Subansiri

No: 27/2017/Tue

Dated: 4th April, 2017

Weather summary of the previous week	Weather forecast valid up to 9 th April 2017
Rainfall = NA (Puchi Geko); Daporjo: 0.0 mm	Partly cloudy weather with possibility of light rainfall in few places. Daily maximum and minimum temperature for the following period is predicted to be 23-27°C and 16-17°C respectively. Expected morning and evening relative humidity will be 92-93% and 56-70% respectively. Expected wind direction is WNW with speed range of 2-4 kmph.
Warning	• Heavy rainfall is likely to occur at isolated places on 5th April

Weather Based Agro-meteorological Advisories Bulletin

- Disinfecting the animal/bird sheds with lime powder/ bleaching powder/ 4%NaOH at regular interval is advocated
- Avoid spray of insecticides during flowering stage as it may hinder pollination by honey bees and other insects.
- Spraying operation should be done only on dry/clear weather
- Go for low cost polyhouses for year round cultivation of vegetables
- Obtain seeds from reputed/certified/reliable source
- Use fertilizers/pesticides as per recommended doses for the location
- Preference must be given on use of organic manures/bio-fertilizers & bio-pesticides
- ICAR Basar recommend poultry variety VANARAJA for backyard rearing

Crop	Stage	Pest/Disease	Precautionary Practices to be followed
FIELD CROPS			
Maize	Sowing		<ul style="list-style-type: none"> Sowing of Maize advocated Carry out seed dressing/treatment with Thiram or Carbendazim @ 2g/kg seed before sowing Follow time isolation of atleast 15 days for two or more different varieties of maize in Jhum field
Pea	Sowing		<ul style="list-style-type: none"> Sowing of pea recommended for higher altitudes with raised bed of 15-20cm Provide proper drainage to already sown crops
Jhum field	Sowing		<ul style="list-style-type: none"> Adopt sowing of leguminous crops like cowpea, frenchbean, soybean etc at 2-3 rows across the slope of jhum field at desirable intervals or ratios with rice to prevent soil erosion and conserve moisture and fertility. Cowpea variety (Kashi Kanchan) and Frenchbean variety (Selection-9) are advocated for intercropping as they are short duration, dwarf and high yielding. Carry out seed dressing/treatment with Thiram or Carbendazim @ 2g/kg seed before sowing
VEGETABLES			
Cole crops	Nursery		<ul style="list-style-type: none"> Raising nursery can be carried out in higher altitudes/ cold areas
Pre-summer vegetables	Sowing	Nursery insects	<ul style="list-style-type: none"> Sowing of pre-summer vegetables like okra, frenchbean etc advocated Carry out seed dressing/treatment with Thiram or Carbendazim @ 2g/kg seed before sowing Right time for transplanting the ready seedlings of chili, tomato, capsicum etc. Provide proper drainage to newly transplanted seedlings and follow raised bed for sowing Spray Azadirachtin 1% (10000 PPM) @ 1000-1500 ml in 500 litres water/ha
HORTICULTURAL CROPS			
Ginger/Turmeric	Planting material collection/ Land preparation		<ul style="list-style-type: none"> Identify healthy plants for seed rhizomes/ collect better seedlings from ICAR Basar or KVK West Siang/Anjaw Keep selected rhizomes for planting material in partial shade for better sprouting. Mulching materials like forest litters or crop residues should be collected in advance Land preparation to a fine tilth to be done before sowing during sunny days Avoid sowing of Ginger/Turmeric during rainy days
Citrus	Flowering	Trunk borer/ Phytophthora symptoms	<ul style="list-style-type: none"> Budding method of propagation (T-budding) to commences in oranges using Rangpur lime as rootstock. Cleaning & smearing of trunk base with Bordeaux paste If flowering begins, avoid spray of insecticides/ pesticides as it may affect pollination process. Spray (Planofix) NAA based growth regulator @2m/5lit water during flowering stage in orange plant to reduce fruit/flower drop
Large Cardamom	Sowing		<ul style="list-style-type: none"> Should be sown in Primary nursery bed at 2cm deep and 10 cm apart followed by mulching & regular light irrigation. The duration of primary nursery being 3-4 months.
Banana	Bunching	Cold	<ul style="list-style-type: none"> Timely/regular removal of extra suckers, dry leaves & pseudo-stem
Apple	Vegetative	Wooly aphids	<ul style="list-style-type: none"> Swab the stem with mineral oil against wooly aphid.

No: 27/2017/Tue

Dated: 4th April, 2017

Changlang (HQ): Latitude: 27.1305856/Longitude: 95.7342373/Altitude: 580 masl

Weather summary of the previous week	Weather forecast valid up to 9 th April 2017
Rainfall = Changlang: 79.6 mm Miao: 78.0 mm	Mostly sunny with possibility of light/moderate rainfall in most of the places. Daily maximum and minimum temperature for the following period is predicted to be 21-25°C and 16-17°C respectively. Expected morning and evening relative humidity will be 87-99% and 50-75% respectively. Wind direction is East & S with speed range of 4-5 kmph.
Warning	• Heavy rainfall is likely to occur at isolated places on 5th April

Weather Based Agro-meteorological Advisories Bulletin

General Recommendations

- **Spraying operation should be done only on dry/clear weather**
- **Go for low cost polyhouses for year round cultivation of vegetables**
- **Obtain seeds from reputed/certified/reliable source**
- **Use fertilizers/pesticides as per recommended doses for the location**
- **Preference must be given on use of organic manures/bio-fertilizers & bio-pesticides**
- **ICAR Basar recommend poultry variety VANARAJA for backyard rearing**

Crop	Stage	Pest/Disease	Precautionary Practices to be followed
FIELD CROPS			
Maize	Sowing		<ul style="list-style-type: none"> Sowing of maize in higher altitudes advocated in raised bed Carry out seed dressing/treatment with Thiram or Carbendazim @ 2g/kg seed before sowing
VEGETABLES			
Pre-summer vegetables	Sowing		<ul style="list-style-type: none"> Right time for transplanting the ready seedlings of chili, tomato, capsicum etc. Provide proper drainage to newly transplanted seedlings and follow raised bed of 15-20cm for sowing
HORTICULTURAL CROPS			
Citrus	Flowering	Trunk borer/ Phytophthora symptoms	<ul style="list-style-type: none"> Budding method of propagation (T-budding) to commences in oranges using Rangpur lime as rootstock. Cleaning & smearing of trunk base with Bordeaux paste If flowering begins, avoid spray of insecticides/ pesticides as it may affect pollination process. Spray (Planofix) NAA based growth regulator @2m/5lit water during flowering stage in orange plant to reduce fruit/flower drop
Ginger/Turmeric	Planting material collection/ Land preparation		<ul style="list-style-type: none"> Identify healthy plants for seed rhizomes/ collect better seedlings from ICAR Basar or KVK West Siang/Anjaw Keep selected rhizomes for planting material in partial shade for better sprouting. Mulching materials like forest litters or crop residues should be collected in advance Land preparation to a fine tilth to be done before sowing during sunny days Avoid sowing of Ginger/Turmeric during rainy days
Large Cardamom	Sowing		<ul style="list-style-type: none"> Should be sown in Primary nursery bed at 2cm deep and 10 cm apart followed by mulching & regular light irrigation. The duration of primary nursery being 3-4 months.

Agro-met Advisory Bulletin

(Period: 5th to 7th April 2017)

ग्रामीण कृषि मौसम सेवा

GRAMIN KRISHI MAUSAM SEWA
(Integrated Agro-Meteorological Advisory Services)

AMFU, ICAR Research Complex for NEH Region
Arunachal Pradesh Centre, Basar-791101

District: Lohit

No: 27/2017/Tue

Dated: 4th April, 2017

Weather summary of the previous week	Weather forecast valid up to 9 th April, 2017
Rainfall =99.7 mm (Tezu)	Partly cloudy with possibility of light/moderate in most of the places. Daily maximum and minimum temperature for the following period is predicted to be 22-24°C and 15-18°C respectively. Expected morning and evening relative humidity will be 87-98% and 44-66% respectively. Wind direction is ENE & SE with speed range of 3-7 kmph.
Warning:	• Heavy rainfall is likely to occur at isolated places on 5th April

Weather Based Agro-meteorological Advisories Bulletin

General Recommendations

- Spraying operation should be done only on dry/clear weather
- Go for low cost polyhouses for year round cultivation of vegetables
- Obtain seeds from reputed/certified/reliable source
- Use fertilizers/pesticides as per recommended doses for the location
- Preference must be given on use of organic manures/bio-fertilizers & bio-pesticides
- ICAR Basar recommend poultry variety VANARAJA for backyard rearing

Crop	Stage	Pest/Disease	Precautionary Practices to be followed
FIELD CROPS			
Maize	Sowing		<ul style="list-style-type: none"> Sowing of Maize advocated Carry out seed dressing/treatment with Thiram or Carbendazim @ 2g/kg seed before sowing Follow time isolation of atleast 15 days for two or more different varieties of maize in Jhum field
VEGETABLES			
Cole crops	Nursery		<ul style="list-style-type: none"> Raising nursery can be carried out in higher altitudes/ cold areas
Tomato	Vegetative/Nursery		<ul style="list-style-type: none"> Cover the crop with polyethene/cloths to protect from frost/rain Nursery raising under protected cultivation
Pre-summer vegetables	Sowing		<ul style="list-style-type: none"> Sowing of pre-summer vegetables like okra, frenchbean etc advocated, avoid sowing during rainy days Carry out seed dressing/treatment with Thiram or Carbendazim @ 2g/kg seed before sowing Right time for transplanting the ready seedlings of chili, tomato, capsicum etc. Provide proper drainage to newly transplanted seedlings and follow raised bed for sowing.
HORTICULTURAL CROPS			
Citrus	Flowering	Trunk borer/Phytophthora symptoms	<ul style="list-style-type: none"> Budding method of propagation (T-budding) to commences in oranges using Rangpur lime as rootstock. Cleaning & smearing of trunk base with Bordeaux paste If flowering begins, avoid spray of insecticides/ pesticides as it may affect pollination process. Spray (Planofix) NAA based growth regulator @2m/5lit water during flowering stage in orange plant to reduce fruit/flower drop
Ginger/Turmeric	Planting material collection/ Land preparation		<ul style="list-style-type: none"> Identify healthy plants for seed rhizomes/ collect better seedlings from ICAR Basar or KVK West Siang/Anjaw Keep selected rhizomes for planting material in partial shade for better sprouting. Mulching materials like forest litters or crop residues should be collected in advance Land preparation to a fine tilth to be done before sowing during sunny days Avoid sowing of Ginger/Turmeric during rainy days
Large Cardamom	Sowing		<ul style="list-style-type: none"> Should be sown in Primary nursery bed at 2cm deep and 10 cm apart followed by mulching & regular light irrigation. The duration of primary nursery being 3-4 months.
Honey Bees			
Honey bees			<ul style="list-style-type: none"> Provide sugar syrup near the box Add insulation and ventilation systems
