

Plant Breeding:-

List of Working Equipments

1. ABI310 genetic analyser
2. Biolistic particle delivery system
3. BOD incubator
4. Deep freezer (-20⁰C)
5. Deep freezer (-80⁰C)
6. Electronic balance
7. Electrophoresis system
8. Electroporator
9. Gel documentation system
10. Generator
11. Grain husker
12. Grain polisher
13. Ice machine
14. Inverted microscope
15. Laminar airflow
16. Leaf area meter
17. Moisture meter
18. Nitrogen analysis system
19. PCR machine
20. Power tiller
21. Real Time PCR machine
22. Refrigerated centrifuge
23. Research microscope with fluorescence attachment
24. Shaking incubator
25. SPAD meter
26. Spectrophotometer
27. Stereo zoom microscope
28. Vacuum evaporator
29. Water purification system
