

Training on “**Integrated Fish Farming System in the Scenario of Climate Change**”

A training programme on “**Integrated Fish Farming System in the Scenario of Climate Change**” was organized to the benefits of farmers and rural youth, on 25th July 2013, at Molvom village, Dimapur, Nagaland. Participants, comprised of thirty numbers (30) of farmers and rural youths, were apprised of the impact of climate change on agriculture and allied sectors through deliberations on the topics like importance, specifications, management of fisheries, selection of fingerlings, integrated fish farming and selection of soil types for different components of integrated farming systems. Queries of the participants were satisfactorily answered by the experts: Dr. Ebibeni and Mr. James Kikon, SMS, KVK Dimapur, Mr. Bikash Sharma and Mr. Meren Jamir, Technical personnel, ICAR. The trainees gained knowledge to adapt to the changing situations and improve the agricultural production system with improved technological knowhow on the different aspects of integrated fish farming.
